DESIGN LVV | MARIEKE CASTELIJM

## Collectie LVV

In de lijn van de succesvolle strokentangels van de LV-collectie, ontwierp Marieke Castelijm in 2009 de collectie LVV. Strakke grote bladen in verschillende lengtes met een mooie verstekverbinding van blad naar wang, worden met de LV-bureaukasten of sideboards tot bureaus gecombineerd. In combinatie met de zijwang ontstaan juist opvallende, asymmetrische tafels. Alle bureaus en tafels hebben een bladdiepte van 100cm. De standaard werkhoogte van 74.3cm is middels ophoogstrippen naar 76.3 of 78.3cm te verhogen. Ook de top- en zijbladen van de kasten zijn uitgevoerd met een verstekverbinding.

Naast alle houtuitvoeringen van het overzicht achterin deze brochure, zijn de LVV-bladen ook in HPL verkrijgbaar. Fraaie uni-kleuren als wit, kiezel en zand laten zich makkelijk combineren met de bestaande lak- en houtkleuren. Van koel zakelijk tot juist warm huiselijk. Of toch kleurrijk en gedurfd doorcombineren vanuit de verwante LV-collectie?

## LVV collection

*Marieke Castelijm's 2009 LVV collection was largely inspired by the successful 'strip desks' of the 2006 LV collection, whose tabletops and side pieces are made up of different-coloured strips. The new LVV collection consists of large, one-piece rectangular tabletops of various lengths, linked to two side pieces by means of beautiful mitre joints. The fact that one side piece is open while the other one is closed gives LVV desks a delightfully asymmetric appearance. Combined with LV drawer units and sideboards, the tabletops make for eye-catching desk arrangements.*

*All LVV desks and tables are 100cm deep. The 74.3cm standard height can be increased to either 76.3 or 78.3cm using height-adding strips. In addition to the various types of wood finish listed on pp. 178-179, we offer LVV tabletops made of HPL.*

*Like the aforementioned tabletops, the tops and sides of LVV bookcases are joined together by mitre joints. Available in shades which are eminently suited to forming a combination with the white, grey and sand-coloured tabletops of the LVV collection, the storage units can be used to create either stylish business environments or cosy-looking homes. Those who like their furniture really colourful are encouraged to have a look at the LV collection, parts of which can be combined with LVV units to create truly eye-popping interiors.*
